Subject: Re: Lobo Basketball Offices

Paul

David has acknowledged to me that he had asked university facility group to review the opportunity. He can speak about that further but I know that he was in support, as you know I am.

As I mentioned to you, I had a walkthrough with the original architects who have a concern about the HVAC. They were going to look at all original plans to review every option. He texted me this week, but with all our stuff this week forgot to mention to everyone his thoughts. Basically he feels it will be a bit tougher to address it than what he originally expected. The architect is traveling for business Monday and Tuesday. I am touching base with him again to set a time to discuss it thoroughly.

David, is there anything else that we are needing to do to keep moving forward. I know the President and I had a conversation about it and she mentioned that she liked the idea.

I will follow up with you on Monday.

Eddie

Hey Guys,

Wondering if either the athletic department or the men's basketball program has received permission on this proposal yet?

Thanks so much,
